EDUCATION

Purdue University — Spring 2019
B.S. Computer Science
Minor in Art and Design
Certificate in Entrepreneurship

EXPERIENCE

Ancestry.com — Summer 2017
Front End Developer
Developed a CDN using React and a Node.js backend to upload and interact with Ancestry's cloud infrastructure.

Redstitch Digital — Summer 2016
Front End Developer
Collaborated with designers and clients to mock and implement custom corporate websites.

Amerilight LLC — 2014 - Present
Full Stack Developer
Worked with the owners to implement a custom web application in Django to manage inventory and sales.

PROJECTS

Commons — Present
Designing and building a mobile platform to help you stay informed about government activity. The app is built using React Native.

Simplif.ai — Fall 2017
Training a neural network to transcribe notes or text into easy to read summaries. Front-end built using React with a Node.js back-end.

Battleship — Fall 2017
Built a multiplayer web game of the classic Battleship board game. Front-end built using React with a Node.js back-end.

Tardy — Spring 2017
Designed and built a web app to stop your friends from being late. Built at HackIllinois using React, Node.js, and Firebase.

OBJECTIVE

I am passionate about creating beautiful experiences that people love. By combining my passion for design with my extensive full-stack experience, I am ready to solve any front-end challenge.

SKILLS

React.js   Javascript   HTML / CSS   Python
Adobe Photoshop   Django   Node.js
Sketch   C++   Java   C

LEADERSHIP / INVOLVEMENT

Director / President — 2016 - Present
The Anvil   (anvilstartups.com)
Manage and run a team that organizes events and fundraising campaigns for The Anvil. The Anvil is the largest student-led co-working spaces in the country, located in West Lafayette, IN.

Design Team Lead — 2016 - Present
BoilerMake   (boilermake.org)
Led the design team for BoilerMake, Purdue's 36 hour hackathon. The design team was responsible for developing the website, graphics, animations, branding, and visuals for the event.

Founding Member / Organizer — 2016 - 2017
Hello World   (helloworld.purduehackers.com)
Helped start a new hackathon at Purdue focused on helping underclassmen learn to program and build real-world applications. I was responsible for the branding, including the website and marketing materials.

Organizer — 2015 - 2017
CSWN   (cs.purdue.edu/cswn)
Helped plan and organize events for Purdue's Computer Science Women's Network. CSWN plans social events to help students relax and engage with others
